

# BBR Mid-Size Pro

Congratulations! You have now ventured into the future of the midsize class. Utilizing the light-weight and high-horsepower capabilities of the XR/CRF motor, and the championship winning technology from our midsize platform, BBR is proud to provide you with a combination that is the very latest in innovation and technology.

## Important details about the BBR Mid-Size Pro:

The BBR Mid-Size pro is based on the KLX/DRZ 110 chassis. The following OEM Kawasaki/Suzuki components will be required to finalize your bike build. Please note that any other OEM or aftermarket products will also revolve around the KLX/DRZ 110 application i.e. wheels, seat, forks, sprocket, etc. (Not CRF or Other 50/70cc applications)

| Kawasaki Description       | Kawasaki Part Number | BBR Description                       | BBR Part Number   |
|----------------------------|----------------------|---------------------------------------|---|
| Step left (left footpeg)   | 34028-1237           | IMS SuperStock Pegs                   | 530-IMS-2004  |
| Step right (right footpeg) | 34028-1238           |                                       |   |
| Pin 8x32                   | 92043-1143           |                                       |   |
| Footrest spring LH         | 92081-1491           |                                       |   |
| Footrest spring RH         | 92081-1543           |                                       |   |
| Cotter 2.5x15              | 92041-1051           |                                       |   |
| Fuel tap assy (petcock)    | 51023-1342           |                                       |   |
| Steering Stem nut 22mm     | 92015-1653           | BBR Billet Aluminum Steering Stem Nut | 517-BBR-1001 (Gold)<br>517-BBR-1011 (Black)<br>517-BBR-1021 (Blue)<br>517-BBR-1031 (Silver)<br>517-BBR-1041 (Red) |
| Steering Stem Washer       | 92022-1873           |                                       |   |
| Steering Lock Nut 25mm     | 92015-1222           |                                       |   |

## Mid-Size Pro Carb Installation:

18mm Carb Kit:

Use supplied manifold adapter to center the carburetor.

24-26mm Carb Kit:

Also uses the supplied manifold adapter. Set adapter offset to the left with the throttle cable running between the frame spar and gas tank.

## Takegawa Manual Clutch:

If you are using the Takegawa Manual Clutch, you will need to use the supplied clutch cable stop located on the frame.
